

AI Meeting Note Taker (Whisper)

♥ An AI-powered application that converts audio recordings into transcripts with timestamps and generates automatic summaries using Natural Language Processing.

I used my fav song beacuse i like it... its amazing song by

♥ ☆ Hanna bahng ☆ ♥

Song name: OLeander ☆

★°☆+°★。° ☆+ °+★。°★°☆+°★。° ☆+ °+★。°

So for Emojis i used

<https://emojidb.org/thunder-emojis>

🌟 Features

- 🎧 Converts MP3 audio to text using OpenAI Whisper
- 🕒 Generates timestamped transcripts
- 💡 Automatically summarizes content using NLP (Sumy)
- 📁 Saves transcripts and summaries into separate folders
- 💻 Works completely offline (no API required)
- 🐍 Built with Python

🔧 Tech Stack

Python

Whisper (OpenAI)

FFmpeg

Sumy (NLP summarization)

NLTK

 pip list

Package Version

breadability 0.1.20

certifi 2026.5.20

chardet 7.4.3

charset-normalizer 3.4.7

click 8.4.1

colorama 0.4.6

docopt 0.6.2

docopt-ng 0.9.0

filelock 3.29.4

fsspec 2026.4.0

idna 3.18

Jinja2 3.1.6

joblib 1.5.3

llvmlite 0.47.0

lxml 6.1.1

lxml_html_clean 0.4.5

MarkupSafe 3.0.3

more-itertools 11.1.0

mpmath 1.3.0

networkx 3.6.1

nltk 3.9.4

numba 0.65.1

numpy 2.4.6

openai-whisper 20250625

pip 24.0

pycountry 26.2.16

regex 2026.5.9

requests 2.34.2

setuptools 81.0.0

sumy 0.12.0

sympy 1.14.0

tiktoken 0.13.0

torch 2.12.0

tqdm 4.68.2

typing_extensions 4.15.0

urllib3 2.7.0

Project Structure

AI meeting note tracker/

|

|— **app.py**

Main Python script

|— **audio/**

Input audio files (MP3)

|— **transcripts/**

Generated transcripts

| |— **output.txt**

|— **summaries/**

Generated summaries

| |— **summary.txt**

|— **requirements.txt**

|— **venv/**

Virtual environment (ignored in GitHub)

|— **README.md**

How It Works

User places an audio file in the audio/ folder

Whisper converts speech → text

Script generates timestamped transcript

NLP model summarizes the transcript

Output saved in transcripts/ and summaries/

Installation & Setup

1. Clone the repository

git clone

<https://github.com/your-username/ai-meeting-note-taker.git>

cd ai-meeting-note-taker

2. Create virtual environment

python -m venv venv

venv\Scripts\activate

Windows

3. Install dependencies

pip install -r requirements.txt

If installing manually:

pip install openai-whisper

pip install torch

pip install sumy nltk

4. Install FFmpeg

Download FFmpeg

Add bin folder to system PATH

Verify:

ffmpeg -version

5. Run the project

python app.py

Output Example

Transcript

[0.00s - 4.50s] Hello everyone, today's meeting starts now.

[4.50s - 10.20s] We will discuss project deadlines.

Summary

Today's meeting focuses on project deadlines and planning.

Use Cases

Lecture note generation

Meeting transcription

Interview analysis

Study material creation

Future Improvements

Web UI using Streamlit

AI-powered advanced summarization (GPT-style)

Export to PDF / Word

Speaker diarization (who spoke when)

Real-time transcription
